## Fitting instructions - CP PI Choke Return Spring Kit

This kit is for those fitting a CP countershaft to their PI system for the first time. It comprises:

- a bracket that fits to the rear face of the upper engine mounting bolt
- throttle return spring
- link wire

Installation instructions:

- Remove the top engine mount fixing and fit the mounting bracket.
- Hook one end of the spring over the screw head on the choke cable fixing trunnion in the choke fast idle cam.
- Fix the other end to the bracket on the engine mount
- The tension can be adjusted by rotating the bracket on the engine mount.
